

Autosomal Transfers

If you or a family member have previously tested your autosomal DNA at 23andMe®, AncestryDNA™, or MyHeritage™, you can transfer your results to FamilyTreeDNA by uploading your raw data file. After transferring your file, your autosomal data is uploaded to our database, one of the world's largest genetic genealogy databases.

When you transfer, for free, you will receive a list of your autosomal matches from our database and have access to our Family Finder – Matrix. The Matrix feature allows you to select and compare the autosomal DNA relationship between up to ten of your matches at one time.

Note: [Family Finder](#) is the name of our autosomal DNA test.

After transferring, you can unlock all Family Finder features, which include the Chromosome Browser, myOrigins, and ancientOrigins for only \$19.

Please note that you can only transfer the following file versions from 23andMe® and AncestryDNA™ :

- 23andMe® V3
- 23andMe® V4
- AncestryDNA™ V1
- AncestryDNA™ V2

Unfortunately, at this time, you cannot transfer 23andMe® V1 or 23andMe® V2 results.

How to Transfer Your Autosomal DNA Results

[New Customers](#)

The following describes how to transfer 23andMe® or AncestryDNA™ autosomal DNA results. for those who **do not** yet have a FamilyTreeDNA kit.

Important: If the person whose results are being transferred **already** has a FamilyTreeDNA kit, please see the *Current Customers* topic.

1. On the [FamilyTreeDNA homepage](#) navigation bar (top of the page), hover your cursor over **Upload DNA Data**, and **click Autosomal DNA** on the drop-down menu.
